

Your manufacturer of conveyor system closures www.abs-brandschutz.de

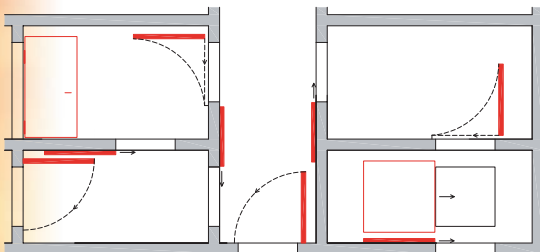

FIRE PROTECTION

Conveyor system closures

We deliver fire protection closures as part of railway based conveyor systems for **all conveyor systems** as well as for pneumatic conveyor systems.

Our product portfolio includes conveyor system closures for wall and ceiling installations of sliding and lifting gates, revolving doors and flaps up to swivel sliding gates.

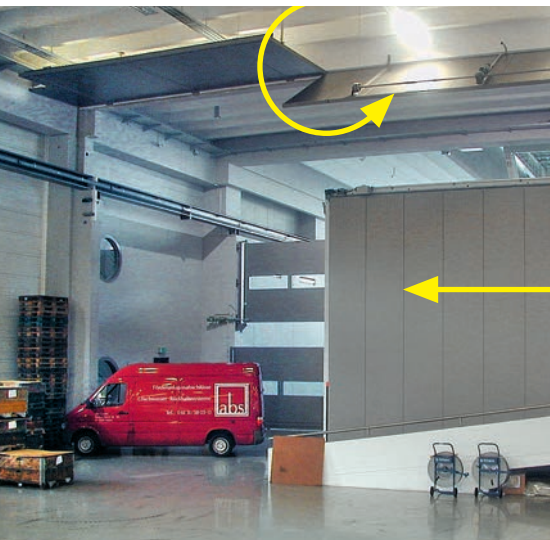

The closures were tested for fire resistance and continuous function. They are manufactured in accordance with our usage verifications **abZ-6.6-1635**, **ETA-16/0938** and the **VKF fire protection applications No. 22765** and **22766**.

Control systems

The distributed control concept consists of control components such as locking system per **abZ-6.500-2515**, relieve control and emergency power supply and it can be mounted directly at the conveyor system closures. On request, the control units can also be delivered in a switch cabinet.

Individual fire protection solutions

We will develop a custom solution for your technical fire protection requirements and we will support you up to the confirmation, in **individual** cases by the public authorities.

Materialprüfanstalt für das Bauwesen

Quality assessment

Public authorities:

The applicability of our products is confirmed by the DIBt, the EOTA and the Vereinigung Kantonaler Feuerversicherungen (VKF).

Fire protection:

Our closures and control components have been tested at renowned test, monitoring and certification bodies, in accordance with **German directives and the European test standards** and are also externally monitored by them.

Quality:

Our quality management is certified per ISO 9001.

We provide

- Products certified technically and legally for fire protection
- Quality through long term experience of the third generation
- On schedule and flexible project execution
- Competent employees
- Service and maintenance

We look forward to your inquiry!
